

SORT, ROLL AND GO...PLEASANTON RECYCLES

A new three-cart trash and curbside recycling program is coming to Pleasanton. Currently, Pleasanton residents put both trash and recyclables into one collection cart, and recyclable material is sorted from trash at our Material Recovery Facility (MRF). When the new program begins in October of this year, residents will put trash and recyclables into separate collection carts. This simple action will capture more recyclable material and send less to the landfill.

Each household will receive a designated 96-gallon recycling cart for glass and plastic bottles, steel or tin cans, jars, cardboard, aluminum containers or foil, and paper. Maximizing the use of your recycling cart will increase recycling and help Pleasanton meet state and regional waste-reduction goals.

In the new program, customers can choose a service option that includes either a 35-gallon or a 96-gallon trash cart. To make your selection, please review the service options below and return the reply card to us by **June 12, 2009**.

A new collection cart and important information about the new recycling program will be delivered to your home prior to the start of the program. Once we receive your reply card, no additional service requests are necessary.

If you have questions, call :
PLEASANTON GARBAGE SERVICE
